

# Harford Achieves!

School and classroom enrichment grants empower teachers by providing them with the resources and opportunities to enhance their students' learning experiences in ways that go beyond traditional academic settings.

## Empowering Educational Innovation

School and Classroom Enrichment grants empower educators to implement innovative ideas and projects that enhance student engagement and learning. This funding offers distinct opportunities to enrich and expand the curriculum through activities in STEAM (Science, Technology, Engineering, Arts, and Math), Literacy, Social Studies, and other areas.

Harford County Education Foundation is committed to equipping teachers with essential resources to ensure that every student graduates from high school well-prepared for success. These grant funded projects are instrumental in inspiring young minds beyond typical school budgets.

Through our online grant portal, donors can easily search for teachers' requests by school or subject and provide crucial funding support to make these projects a reality.

## Benefits of Classroom Grants

**1. Hands-On Learning:** This hands-on approach enhances understanding and retention of concepts by allowing students to apply theoretical knowledge in real-world contexts.

**2. Critical Thinking and Problem-Solving:** Enrichment projects encourage students to think critically and creatively. They are challenged to analyze information, evaluate options, and solve problems, fostering essential skills that are crucial in academic and professional environments.

**3. Personalized Learning:** These projects can be tailored to meet students' individual interests, learning styles, and abilities, making learning more relevant and engaging for each student.

**4. Collaboration and Communication:** Many enrichment projects require teamwork and communication among students, promoting social skills, cooperation, and the ability to work effectively in groups—a vital competency for success in future endeavors.

**5. Real-World Relevance:** Enrichment projects often simulate real-world situations or address authentic challenges applying their knowledge in practical settings outside the classroom
